

How To Transcribe A Recording From Your Olympus Digital Recorder to MS Word Using the Olympus Dictation Module Software 1.0

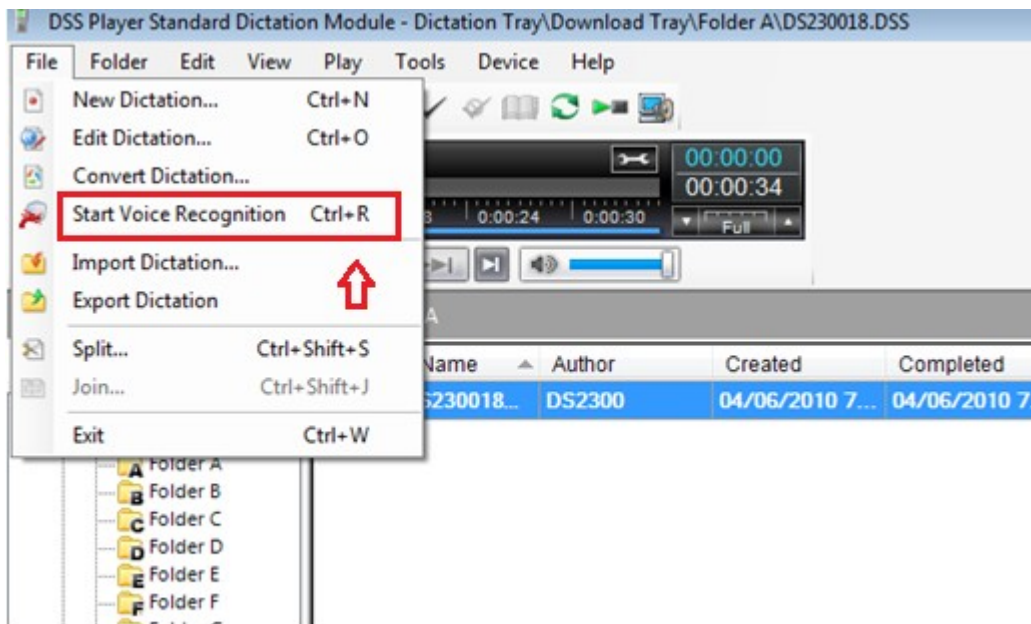

- 1) Launch Dragon. Then open or create a new MS Word document. Do not minimize.
- 2) Connect your recorder to the computer using the usb cable included with the recorder; the Olympus Dictation Module software should automatically launch.
- 3) Use the Olympus software to download the recording to the computer (Dictation Tray) by clicking on the Device menu and selecting the folder to download.

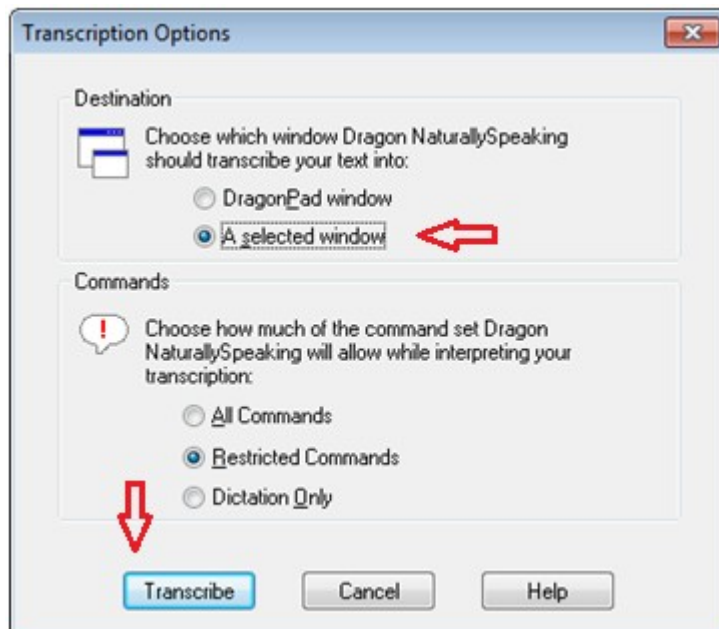

- 4) Use the mouse to select/highlight the recording to be transcribed.

5) Go to the File Menu and select Start Voice Recognition

6) The Transcription Options dialogue box appears. Make sure “A Selected Window” is selected. Then click the Transcribe button.

7) The following prompt appears. Click in MS Word document and your audio recording will be transcribed into the MS Word document.
